

# OCEAN FISHING

BY JACK

America's pastime not baseball but fishing. But today we're going to talk about ocean fishing.

## Getting Started

To get started you need a fishing rod, fishing line and a lure. I suggest using a long ugly stick with a fake eel. But it would be a good idea to have bait. You also can catch bait. To catch small bait use a small shiny lure. To catch medium sized bait, use an eel, fake or live, small bait or fake fish (lots of hooks on it). To catch large bait, use medium sized bait, or a large fake or live eel.

## Homemade lures

To make a homemade lure, find an old metal spoon and cut it to the shape you want. Then cut a hole where the fishing line can go through.

## Catch different fish

To catch fish like blue fish use a fake eel or light lures lots of hooks on them. To catch like stripe bass use a kind of lure called chubby cheeks or a fish called porgy. To catch fish like porgy use a fishing worm, clam, squid or fake eel.

Now that you now how to ocean fish get out there and start fishing.

p.s. don't expect to be the best as soon as you start fishing it takes practice.
