

Skim Board Tricks

By Vincent

Hey, do you know how to do skim board tricks? Well I will teach you how.

Kiddy easy

Well for a beginner there are beginner tricks.

On the sand 360 is a very easy trick you just go and dig your hand in the sand and spin. An Ollie is not hard at all. You just stomp your foot on the back of the skim board and you go up in the air.

Yoda is an easy trick because you go and then you sit and cross your arms and act like Yoda in his flying chair. I think that the fire hydrant is funny because you go and you go on all fours and

act like a dog going pee.

The shuvit or shove it is a basic trick or a bit hard all you do is get you and your board in the air and you jump off your board and spin in a 180 degrees or more. The coffin is fun but creepy because you get on your board and you lie on your back and act like you are in a coffin.

Flyaway is an easy trick because you go into a wave and flyaway. The bomb drop is a hard trick because you run jump put the board under and land it if you don't you will hurt your butt.

Mrs. Intermediate

The headstand is a hard trick because you go and do a headstand. A flip is a hard trick because you have to spin upside down and land it.

A floater is a hard or easy trick it depends on the

wave you go in a wave and jump off in the whitewater.

Mr. Advance

An aerial is launching into the air keeping the board under your feet and land in front or in back of the wave and Ollie's off the wave don't count sorry. An aerial shovit is an

aerial and a shovit in one just do an aerial and a shovit. A 360 aerial is hard because you do a 360 and an aerial in one.

Now that you now how to skim board go to the beach and have fun.
